Introduction

With this notice, we complete the CCP process for Leopold and St. Croix WMDs, which we started in 71 FR 20722 (April 21, 2006). For more about the initiation process, see that notice. We released the draft CCPs and environmental assessments to the

public, announcing and requesting comments in a notice of availability in the **Federal Register** (73 FR 43468, July 25, 2008).

Leopold and St. Croix WMDs are located in Wisconsin. Established in 1993, the Leopold WMD manages 53 waterfowl production areas (WPAs) totaling more than 12,000 acres in 17 southeastern Wisconsin counties. The District also administers 48 conservation easements within an eastern Wisconsin area of 34 counties. The St. Croix WMD, also established in 1993, manages 41 WPAs totaling 7,500 acres within an 8-county District of west-central Wisconsin. The District also administers 14 conservation easements. WPAs consist of wetland habitat surrounded by grassland and woodland communities. While WPAs are managed primarily for ducks and geese, they also provide habitat for a variety of other wildlife such as grassland birds, shorebirds, wading birds, mink, muskrat, wild turkey, and deer.
